The RawCode Wordpress Plugin

Description

Insert complete code (HTML, CSS, and Javascript) directly to Wordpress posts and pages.

The Raw Code plugin allows code to be inserted directly into posts and pages. By default Wordpress parses content entered into posts and pages and automatically inserts `` and `` paragraph tags around what it deems to be paragraph content. This breaks HTML, CSS, javascript, and other code, preventing it from functioning. Examples of usage include inserting web form code created in another system (email marketing system, CRM system, etc.).

Installation

Install the RawCode Plugin

Follow these step-by-step instructions to setup and use the Raw Code plugin.

Unzip the "RawCode-1.0.tgz" file.

Double-click the "RawCode-1.0.tgz" file to unzip it.

Upload the RawCode Plugin Files 000 Orion ⇔ -88 0 C Q- Local View Window Quick Look Action Sync Search Ed Phelps MacBook Software Wordpress Plugins 2010 / > srv > www > gigi wp−content ▼ Name A Size Date Name A Date customizable-post-listings Jul 6, 2010 3:58 PM index.php 30 B 6/21/10 5:30 PM __ customizable-post-listings.zip 8 KB Jul 8, 2009 5:10 PM minimal-xpert-xxx Jul 6, 2010 3:27 PM docsubmit 5/10/10 8:06 PM plugins 7/14/10 9:09 AM docsubmit_1.0.tgz 41 KB 6/22/10 10:01 PM akismet 6/21/10 5:31 PM ▶ mextgen-gallery 6/14/10 4:23 PM all-in-one-seo-pack 6/22/10 9:50 PM nextgen-gallery.zip 745 KB 7/3/10 12:14 PM comment-license 6/22/10 9:50 PM permalinks-migration-plugin-for-... 7/3/10 12:49 PM 6/22/10 9:50 PM communications 12 KB Jul 3, 2010 3:45 AM custom-admin-branding 6/22/10 9:51 PM rawcode-1.1.tar.gz Jul 3, 2010 3:22 AM 6/22/10 10:02 PM 4 KB docsubmit rawcode-1.1.tgz 0 B 7/14/10 9:22 AM events-manager 6/22/10 9:51 PM ShowHide 16 KB 7/14/10 9:08 AM hello.php 2 KB 6/21/10 5:31 PM ShowHide.tgz 4 KB 7/14/10 9:08 AM index.php 30 B 6/21/10 5:31 PM ShowHide.zip 4 KB Jul 2, 2010 5:41 PM maintenance-mode 6/22/10 9:51 PM wickett-twitter-widget 6/4/10 1:37 AM nextgen-gallery 6/22/10 9:51 PM wickett-twitter-widget(2).zip 12 KB Jul 1, 2010 9:41 PM permalinks-migration-plugin... 6/22/10 9:51 PM wordpress-mu-domain-mapping 6/22/10 11:07 PM podpress 6/22/10 9:51 PM wordpress-mu-domain-mapping.0.... 20 KB Jul 1, 2010 9:29 PM rawcode 6/22/10 9:53 PM wp-hide-post 1/3/10 5:38 PM 6/22/10 9:51 PM role-manager wp-hide-post.1.1.9.zip 90 KB 3/11/10 6:38 PM ShowHide 7/14/10 9:09 AM ▶ mp-pagenavi 6/7/10 10:07 PM wp-hide-post Jul 6, 2010 4:03 PM wp-pagenavi.2.72.zip 172 KB Jul 2, 2010 5:47 PM wp-piwik 6/22/10 9:51 PM ▶ mp-piwik Jul 5, 2010 3:52 PM ▶ mp-polls 6/22/10 9:51 PM wp-piwik.0.7.1.zip 197 KB Jul 6, 2010 2:04 PM wp-postratings 6/22/10 9:51 PM wp-realtime-sitemap Jul 6, 2010 8:07 PM 6/22/10 9:51 PM wp-postviews wp-realtime-sitemap.zip 12 KB 7/7/10 12:05 AM 6/22/10 9:51 PM ▶ ■ wp-print

Upload the "RawCode" directory (folder and all contents) to to the '/wp-content/plugins/' directory.

What code can I use? The Raw Code Plugin accepts full HTML, CSS, and Javascript code. PHP cannot be used.

Where can code be placed?

With the Raw Code Plugin, code can be placed into posts, pages, sidebars, headers, footers where site administrators can add and edit content. Simply paste or enter a Replacement Tag code in the content editor field, and publish the content.

NOTE: Be sure to size content to fit the content area. For example if your site sidebar is 200 pixels wide, then your Raw Code content width should not exceed 200 pixels.
